

# IWM WORLDWIDE FLEXIBLE FUND (A)

MINIMUM DISCLOSURE DOCUMENT

30 JUNE 2023

## INVESTMENT OBJECTIVE

The IWM Worldwide Flexible Fund is a worldwide portfolio that aims to deliver a moderate to high long-term total return through global investments and outperform the benchmark \* on a risk adjusted basis.

## INVESTMENT UNIVERSE

In order to achieve its objective, the investments to be included in the portfolio may comprise a combination of assets in liquid form, money market instruments, interest bearing securities, bonds, debentures, corporate debt, equity securities, property securities, preference shares, convertible equities and non-equity securities. The manager may invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective investment schemes as the Act may allow from time to time, and which are consistent with the portfolio's investment policy.

The Fund is a global fund with a flexible mandate to invest in a combination of liquid securities, money market instruments, interest bearing securities, bonds, debentures, equity securities, property securities, preference shares and convertible equities. The fund is actively managed and follows a market orientated investment approach towards equity valuation.

## ANNUALISED RISK VS. RETURN ANALYSIS

PORTFOLIO MANAGER COMMENT

PORTFOLIO REVIEW

A "dollar drought" has been wreaking havoc on emerging markets, as a scarcity of dollars in these markets impede commerce and place severe strain on local currencies and sovereign debtors. A quarter of emerging markets and developing economies have effectively lost their access to the international bond market (World Bank, 2023). Growth forecasts for some of the economies most affected by the credit crunch have declined by as much as half.

The sharp increases in interest rates around the world have already seen Sri Lanka and Ghana default, and several other emerging markets are at risk as well.

Some countries are trying to break away from the dollar's stranglehold. In April, the idea of a BRICS common currency was floated, which may be explored further at the BRICS summit in August. And since Western sanctions cut Russia off from the global banking system, China and India have been paying for Russian oil in currencies other than the US dollar.

Argentina has announced it will pay for Chinese imports in yuan. But China's capital controls - and the unrivalled depth of U.S. financial markets - mean the yuan is unlikely to challenge the dollar as a global force anytime soon (Reuters, 2023).

And heightening US-Sino tensions have been closely watched by investors this past month, with the latest being that the US is considering further tightening export controls on AI chips.

Chinese economic recovery seems to have largely stalled with Chinese and Hong Kong stocks slumping after disappointing domestic tourism figures for the three-day Dragon Boat Festival. In May, property investment continued to decline, industrial output and retail sales growth missed forecasts, and youth unemployment hit a record high of 20.8%. Markets broadly expect stimulus policies to be unveiled after a regular meeting of the Communist Party's political bureau in July. The Chinese premier, while speaking at a World Economic Forum event, declared China was still on track to meet its annual growth target of 5% with the government taking steps to boost demand, invigorate markets, accelerate the transition to green energy, and open high levels of its economy to the outside world.

PORTFOLIO POSITIONING

Net equity exposure in the Fund is 38.7% and Cash is at 21.8%.

RISK PROFILE

MEDIUM - HIGH RISK

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long-term investment returns could therefore be higher than a medium risk portfolio.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long term investment horizons.

**RISK STATISTICS**

Annualised Volatility	Fund	Benchmark
Year-on-Year	2.83%	2.92%
Since Inception	9.88%	9.33%

Maximum Drawdown	Fund	Benchmark
Year-on-Year	13.86%	12.85%
Since Inception	31.31%	24.69%

**PROJECTED TOTAL EXPENSE RATIO (TER)**

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and TIC calculations are based upon the portfolio's direct costs for the year ended 31 March 2023.

**INVESTMENT MANAGER**

IWM Capital is an authorised CIS Manager - Licence C119024095.

- Additional information, including application forms, annual or quarterly reports can be obtained from Sanlam Trustees International, Mauritius.

**DISCLAIMER**

IWM Capital ("IWM") is a licenced CIS Manager, approved by the Financial Services Commission of Mauritius according to Section 98 of the Securities Act of 2005 and the Financial Services (Consolidated Licensing and Fees) rules of 2008. The licence is subject to the terms and conditions set out in the approval obtained on 1 August 2019. Collective Investment Schemes in securities are generally medium to long term investments. The value of participatory interests may go up or down and past performance is not necessarily an indication of future performance. IWM does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices. A schedule of fees, charges and maximum commissions is available on request. IWM reserves the right to close the portfolio to new investors and reopen certain portfolios from time to time to manage them more efficiently. Additional information, including application forms, annual or quarterly reports can be obtained from IWM, free of charge. Performance figures quoted for the portfolio are from Bloomberg, as at the date of this minimum disclosure document for a lump sum investment, using NAV-NAV with income reinvested and do not take any upfront manager's charge into account. Income distributions are declared on the ex-dividend date. Actual investment performance will differ based on the initial fees charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax. IWM retains full legal responsibility for the third party named portfolio. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, IWM does not accept any responsibility for any claim, damages, loss or expense, however it arises, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of IWM's products. Annualised return is the weighted average compound growth rate over the performance period measured.
